List of Sect. J. W. Robbins, L. Sup. Grasses

- 38 *Panicum depauperatum* Michx.
 39 " " "
 40 " " "

14 *Stilium affinis* L.

31 *Setaria viridis*

32 *Oryzopsis Canadensis* Torr.

33 " *asperifolia* Michx.

23 *Brachyelytrum aristatum* Beauv.

28 " *arundinacea* - in fruit

36 } *Alopecurus gemmatulus* L. - in which

37 } I include *A. aristulatus* & a fullness as
 I am unable to distinguish them as
 species -

40 *Phorolobus serotenus* Gray.

41 *Agrostis scabra* Willd. - weak form -

42 " " "

43 " " "

44 " " " or a *clavata* Michx. - a

species in which I have no confidence.
 The ligule which is one of the characters
 for *A. clavata* is wanting - I should
 call it *A. scabra* -

15 *Calamagrostis Learysdoffii* Kun

16 " *Canadensis* Desv.

17 *C. Learysdoffii*? show this to Gray - I
 have no authentic specimens -

18 } *C. stricta* Kun

19 } " "

27 *Stachys spicata* - Beauv.

35 *Trisetum subspicatum* Beauv. - the typical
 form -

34 - var. *molle*, Gray - not very broad leaves
 have only seen - one form - *californicus* - but it
 is very smaller

26 *Aira flexuosa*

24 *A. caespitosa* - The specimens agree

with my own of var. *puberula* - but where
 is one to stop if the names varieties in
 this species - Gray should be -
